

## 第三单元 CASCADING STYLE SHEETS (PART III)

学号	
姓名	

提交截止日期	2019年4月12日 (第八周周五)
提交地址	http://xzc.cn/DQqmdh2324

请写出下列专业词汇对应的中文。

order	
degree	
decoration	
spacing	
alignment	
predefined	
border	
padding	
margin	
sorting	

请观察右侧 HTML 代码在浏览器的显示效果，说明为什么两个段落会显示为红色。

```
<BODY style="font-size: 24pt; color: red">
<P>Hotel booking from the comfort of your
room.</P>
<P>Compare and book from more than 5000 hotels.
</P>
</BODY>
```

Hotel booking from the comfort of your room.  
Compare and book from more than 5000 hotels.

(Exercise 3.6) Create and test an HTML document that describes nested ordered lists of cars. The outer list must have three entries: compact, midsize, and sports. Inside each of these three lists there must be two sublists of body styles. The compact- and midsize-car sublists are two door and four door; the sports-car sublists are coupe and convertible. Each body-style sublist must have at least three entries, each of which is the make and model of a particular car that fits the category. The outer list must use uppercase Roman numerals, the middle lists must use uppercase letters, and the inner lists must use Arabic numerals. The background color for the compact-car list must be pink; for the midsize-

car list, it must be blue; for the sports-car list, it must be red. All the styles must be in a document style sheet.

## HTML 代码

## CSS 代码

This Is A Sentence.请问该样式对应 text-transform 样式属性的哪个选项?

很多样式属性的值都需要用到单位，例如字体大小是多少 px、多少 em 等。请写出 1 inch 等于多少 picas(pc)，多少 points(pt)，多少 pixels(px)?

请问下面的代码为什么要定义两个外部样式表，它们的作用是什么?

```
/*-----Initial.css-----*/  
/* Make sure the non-content elements are hidden */  
head, title, meta, script, link, style, base {  
  display: none;  
}  
/* Default styling for emphasis and strong elements */  
em {  
  font-style: italic;  
}  
strong {  
  font-weight: bold;  
}  
/* Style the text */  
body>h1 {  
  font-size: 1.5rem;  
  color: hsla(175, 80%, 60%, .8);  
}
```

```
/*-----Print.css-----*/  
body>h1 {  
  color: black;  
}  
body {  
  border: 1px solid;  
  border-color: black;  
  border-radius: 25px;  
  padding: 24px;  
}
```

```
<!DOCTYPE html>  
<html lang="en" manifest="sample.appcache">  
<head>  
  <meta charset="utf-8" />  
  <meta name="author" content="Mark J Collins" />  
  <meta name="description" content="Sample HTML document" />  
  <title>HTML5 Sample</title>  
  <link rel="stylesheet" href="Initial.css" />  
  <link rel="stylesheet" href="Print.css" media="print" />  
</head>
```

```
<body>
  <h1>
    Hello World!
  </h1>
</body>
</html>
```

请写出下图所示表格的 HTML 代码和样式表规则。

Squares and Cubes

	Number	Squared	Cubed
Two	2	4	8
Three	3	9	27
Four	4	16	64
